Summary

I am a recent Computer Science graduate eager to begin my career in the industry. I have been actively working on side projects to enhance my skills and build a strong portfolio. My goal is to join a company where I can apply my knowledge while learning and growing under the guidance of experienced peers and supervisors. I bring a fresh perspective, a strong willingness to learn, and adaptability to thrive in a role while aligning with a company's specifications and values.

Education

University of Alberta

September 2020 – June 2025

- Bachelor of Science in Computer Science

Technical Skills

- Excel, Word, SQL, JavaScript, C#, C, Python, Java, HTML, XML, CSS, Scheme, Prolog

Certifications

CC Certified in Cybersecurity (ISC2.org)

- Introduction to relevant Cybersecurity terminology and business structures
- Detecting threats, business models to mitigate threats, and IT solutions for scalable data

Software Engineering Projects

Nine Men's Morris (Python, Front-End Development)

- Collaborated with a team of three to develop the game Nine Men's Morris using Android Studio.
- Designed the front-end interface and implemented game logic, including the removal of pieces.

Food Pantry Application (Java, Back-End Development, Database management, SQL queries)

- Worked with a team of four to build a food pantry app for a community partner, using Android Studio.
- Focused on back-end development, implementing features such as saving the app state using JSON, page navigation, and pantry inventory management.

Hockey Database (MySQL, Flask, Virtual Environments, HTML, CSS)

- I wanted to practice with creating and maintaining my own database from scratch
- Created Schema, structure, and relationships for the database
- Implemented the database, and used Visual Studio Code to connect database to a website I created
